

Sefik Furkan Bayram

Senior Front-end Developer

Istanbul, Turkey | sefikfurkanbayram@gmail.com | [linkedin.com/in/sfbdev](https://www.linkedin.com/in/sfbdev)

PROFESSIONAL SUMMARY

Senior Front-end Developer with 8+ years of experience architecting and scaling production-grade web applications across fintech, travel, e-commerce, and foodtech industries. Specialized in frontend architecture design, legacy-to-modern migration strategies (Vue 2 to Vue 3), and building maintainable, long-lived codebases that support growing teams and evolving product requirements. Deep expertise in the Vue.js ecosystem (Vue 2/3, Nuxt.js, Pinia, Vuex) and cross-framework fluency with React.js. Proven track record of collaborating with distributed teams across Canada, Latin America, Estonia, and Turkey. Additionally ships indie mobile apps to the App Store as a solo developer.

TECHNICAL SKILLS

Frameworks & Libraries:	Vue.js (Vue 2/3), Nuxt.js, React.js, Pinia, Vuex, Storybook, Quasar
Languages & Markup:	JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Emotion
Build & Tooling:	Vite, Webpack, Babel, Git, Jenkins, CI/CD pipelines
Mobile & Cross-platform:	Capacitor.js, iOS App Store publishing & ASO
Services & Platforms:	Firebase (Auth, Firestore, FCM, Cloud Functions), Adapty, Figma, Zeplin, Jira
Architecture & Practices:	Large-scale codebase migration (Vue 2 to 3), modular component architecture, monorepo structuring, design system implementation, SSR/SSG (Nuxt.js), frontend performance optimization, state management architecture (Vuex, Pinia), responsive/mobile-first design, cross-team API contract collaboration

WORK EXPERIENCE

Senior Front-end Engineer <i>AGRA Fintech, Istanbul, Turkey (Hybrid)</i>	Dec 2024 – Present
Leading the migration of a legacy financial analysis and risk assessment platform from Vue 2 to Vue 3, used by SME and enterprise clients for trial balance and e-ledger data analysis.	
Refactored core codebase architecture, reducing build times by ~30% and significantly improving long-term maintainability across the frontend.	
Modernized state management from Vuex to Pinia with a modular store pattern, enabling faster developer onboarding and more predictable data flow across the application.	
Introduced a shared component library and established frontend coding standards to ensure consistency across multiple product teams.	
Senior Front-end Developer <i>Tatil.com, Istanbul, Turkey</i> <i>Leading OTA with 5M+ monthly visitors</i>	Sep 2023 – Dec 2024
Architected a third-party booking integration module (Vue.js) enabling B2B partners to embed hotel and tour booking services into their own platforms as a standalone, framework-agnostic widget.	
Collaborated with backend engineers on API contract redesign, decoupling frontend dependencies and reducing response handling complexity.	
Developed the tour sales module on the main web platform using React.js, Emotion, and Storybook for consistent component-driven development.	
Drove the adoption of a design system approach with Storybook, improving cross-team UI consistency and reducing duplicated component code.	

Front-end Developer

May 2021 – Nov 2022

KBOX Global, Istanbul, Turkey – Cloud kitchen platform operating across multiple markets

Built a comprehensive operations dashboard for cloud kitchen clients, featuring order tracking, inventory management, sales/growth analytics, and menu creation with a modular Vue.js architecture.

Designed the frontend state layer with Vuex for the marketplace application, managing complex cross-module data dependencies between kitchen, brand, and order entities.

Front-end Developer

Jan 2020 – Jan 2021

CDEV, Istanbul, Turkey – Canadian company, serving Latin American markets

Built a casino games listing page from scratch with lazy loading and virtualized rendering, improving UI performance for users across Latin America.

Optimized the betslip component, achieving a **40% frontend performance increase** through code refactoring and Vuex state management restructuring.

Worked with Nuxt.js (SSR), Webpack, Babel, and Jenkins in a CI/CD pipeline environment.

Collaborated daily with distributed teams in **Canada and Latin America** in an English-speaking, cross-timezone workflow.

Front-end Developer

Dec 2018 – Jan 2020

Alegra Digital, Istanbul, Turkey – One of Turkey's largest e-commerce agencies

Developed e-commerce platforms for global brands including Godiva, Kiehl's, NYX Cosmetics (Local), Bauhaus, and P&G Turkey (B2B).

Led responsive, mobile-first standardization across 8+ concurrent client projects, establishing shared layout components and breakpoint conventions.

Collaborated with product teams and designers, translating Figma/Zeplin designs into pixel-perfect, reusable components.

Front-end Developer, Intern

Aug 2018 – Nov 2018

BT & Partners Group, Tallinn, Estonia

Developed and launched two WordPress + WooCommerce websites with custom theme implementation for a European company.

Built reusable email templates and configured internal communication infrastructure.

PUBLISHED APPS & INDEPENDENT WORK

Hexify – Personal app development brand

Islam 360 (App Store): Full-stack Islamic companion app built with Vue 3 + Capacitor.js. Features prayer times, Quran reader, dhikr counter with haptic feedback, and multilanguage support (8 languages). Solo development end-to-end: product design, Firebase backend (Auth, Firestore, FCM, Cloud Functions), subscription management (Adapty), ASO across 8 locales, and App Store publishing.

Independently built and shipped multiple mobile applications, managing the full product lifecycle from ideation and design through development, monetization, and growth.

EDUCATION

BSc, Computer Science (EQF Level 6)

Sep 2014 – Jun 2018

Mersin University, Turkey

LANGUAGES

Turkish (Native) | English (Professional Working Proficiency)

Open to relocation with visa sponsorship. Experienced in working with international, distributed teams across multiple continents.
